# Choose **Select an entire city, county, or state** **NOT** Find it on a Map

The screenshot shows the eBird Northwest 'Where did you bird?' form. The browser address bar is <http://ebird.org/ebird/pnw/submit>. The page title is 'Where did you bird?' with steps 1, 2, and 3. The main heading is 'Identify the location where you made your observations.' There are four options: 'Choose from Your Locations' (with a dropdown menu showing 'Mima Mounds Natural Area' and a 'Continue' button), 'Find it on a Map' (with a search input field), 'Use Latitude/Longitude' (with a sub-heading 'Create a new location using latitude and longitude.'), and 'Select an entire city, county, or state' (which is circled in red). Below this circled option is the text: 'If you were birding across a very large area (e.g., an entire state, county, or city) select this option. Please consider using more precise locations when reporting to eBird so that your observations are more valuable for analysis.' The 'Import Data' option is at the bottom with a 'Learn how' link. The footer contains '© Cornell Lab of Ornithology | Contact | FAQ' and the system tray shows the date '3/21/2015' and time '7:22 AM'.

1 2 3 **Where did you bird?**

**Identify the location where you made your observations.**

**Choose from Your Locations**

Mima Mounds Natural Area

[Edit "My Locations" list](#)

**Find it on a Map**

**Use Latitude/Longitude**

Create a new location using latitude and longitude.

**Select an entire city, county, or state**

If you were birding across a very large area (e.g., an entire state, county, or city) select this option. Please consider using more precise locations when reporting to eBird so that your observations are more valuable for analysis .

**Import Data**

Import data from a spreadsheet, database, or birding program. [Learn how](#)

Comments: Wind rating: 1; Sagebrush count 1-10

Continue

**Your second entry will be your 10 minute point count. This will be a stationary observation type.**

**Add wind rating and sagebrush count for your point count entry!!!**

Your 3rd entry will be the birds you observe walking back to the parking AFTER the stationary 10-minute point count.

# Bird data entry for all three counts;

The screenshot shows the eBird data entry form for a checklist. The browser window title is "Step 3: What did you see or hear? - eBird - Mozilla Firefox". The URL is "ebird.org/ebird/submit/checklist". The page is divided into sections for different bird groups: GLAUCOUS-WINGED GULLS, PIGEONS AND DOVES, OWLS, NIGHTJARS, and SWIFTS. Each section has a list of species with checkboxes and "Add Details" buttons. The "Caspian Tern" and "Mourning Dove" are selected. The "Barn Owl" is selected and its details form is expanded. The details form includes a "Details" text area, an "Age & Sex" table, and a "Breeding Code" dropdown menu. The "Age & Sex" table has columns for "Juvenile", "Immature", "Adult", and "Age Unknown", and rows for "Male", "Female", and "Sex Unknown". The "Sex Unknown" row has a "1" in the "Age Unknown" column. The "Breeding Code" dropdown menu is currently set to "None".

**Clicking add details will open the interface below**

**ALSO: Add breeding bird behavior and any unique behavior in details tab.**

**Enter age and sex if applicable.**

**Enter the number of species or enter X if you only are acknowledging that the species occurred at your site.**

**Next slide will address breeding code, click to bring up drop down menu if any breeding behavior is observed.**

Are you submitting a complete checklist of the birds you were able to identify?

Yes  No ?

**Before finally entering your birding data eBird will ask you if you are entering a complete checklist. Your travelling point counts do not have to be complete checklists. When you enter your stationary point count you NEED to enter a complete checklist-and include every bird you were able to identify.**
